In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. 	<p>Change in Asset Allocation Pattern / Portfolio rebalancing</p> <p>Short Term Defensive Consideration: In accordance with the provision no. 1.14.1.2 of para 1.14 under Chapter 1 of SEBI Master Circular for Mutual Funds dated June 27, 2024, the above investment pattern is only indicative and may be changed by the Fund Manager for a short term period on defensive considerations as applicable under SEBI (MF) Regulations 1996 and circular issued thereunder, the intention being at all times to seek to protect the interests of the Unit Holders. Rebalancing of the portfolio will be done when the asset allocation falls outside the range given above. If the exposure falls outside the above mentioned asset allocation pattern, it will be restored within 7 calendar days or as specified by SEBI from time to time.</p> <p>Portfolio Rebalancing / Replication Norms: As per provision no. 3.6.7 under Chapter 3 of SEBI Master Circular for Mutual Funds dated June 27, 2024, in case of change in constituents of the index due to periodic review, the portfolio of Index Funds be rebalanced within 7 calendar days or as specified by SEBI from time to time.</p> <p>Any transactions undertaken in the scheme portfolio of UTI Nifty200 Quality 30 Index Fund in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.</p> <p>The AMC may create segregated portfolio in case of a credit event in respect of debt and money market instruments at issuer level i.e., downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA). (subject to guideline specified by SEBI which may change from time to time).</p> <p>The creation of segregated portfolio shall be optional and at the discretion of UTI AMC.</p>
Investment Strategy	<p>Investment focus and asset allocation strategy</p> <p>The scheme is a low-cost index Fund which tracks the Nifty200 Quality 30 Index passively. The scheme endeavors to achieve return equivalent to underlying index while minimizing tracking error.</p> <p>UTI Nifty200 Quality 30 Index Fund will be managed passively with investments in stocks comprising the Underlying Index subject to tracking error. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index as well as the incremental collections/redemptions in the Scheme.</p> <p>A part of the funds may be invested in debt and money market instruments, to meet liquidity requirements. Since the Scheme is index fund, it will only invest in securities constituting the Underlying Index.</p> <p>As part of the Fund Management process, the Scheme may use derivative instruments such as index futures and options, or any other derivative instruments that are permissible or may be permissible in future under applicable regulations. The Scheme intends to use derivatives for the purpose of hedging and portfolio balancing.</p>
Risk Profile of the Scheme	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment.</p> <p>Past performance of the Sponsors / AMC / Mutual Fund does not guarantee future performance of the scheme.</p> <p>Safety net or guarantee provided – The Scheme does not provide any guarantee or assured return.</p> <p>1. Scheme specific risks factors</p> <p>a. Investors may note that AMC's/Fund Manager's investment decisions may</p>

	<p>not always be profitable, even though it is intended to generate capital appreciation and returns by passively investing in equity/ equity related securities.</p> <p>b. The value of the investments in the scheme, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.</p> <p>c. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the equity and equity related investments made by the Scheme which could cause the scheme to miss certain investment opportunities. Different segments of the financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The inability of the Scheme to make intended securities purchases due to settlement problems could also cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in a Scheme's portfolio due to the absence of a well-developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in a Scheme's portfolio.</p> <p>d. The Scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives.</p> <p>e. The scheme intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the scheme will be subject to credit risk as well as settlement risk, which might affect the liquidity of the scheme.</p> <p>f. Portfolio Concentration Risk: Index Funds being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager's decisions.</p> <p>g. Tracking Error and Tracking Difference Risk The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. "Tracking difference" is the annualized difference of daily returns between the index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible within the limits as prescribed in provision no. 3.6.3 of para 3.6 under Chapter 3 of SEBI Master Circular for Mutual Funds dated June 27, 2024. There can be no assurance or guarantee that the</p>
--	--

	<p>Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index.</p> <p>h. Passive Investments As the scheme proposes to invest not less than 95% of the net assets in the securities of the underlying Index, the scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.</p> <p>i. Portfolio Turnover policy The scheme is a passively managed fund and therefore the portfolio turnover will be confined only to rebalancing of the portfolio on account of new subscriptions, redemptions and changes in composition of the underlying index.</p> <p>2. Risk factors associated with Creation of Segregated Portfolio</p> <p>a. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.</p> <p>b. Security comprises of segregated portfolio may not realise any value.</p> <p>c. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</p> <p>3. Risks Associated with scheme</p> <p>a. UTI Nifty200 Quality 30 Index Fund is a passively managed index fund i.e. the amount collected under the scheme is invested in securities of companies comprising the underlying index in the same weightages as they have in the underlying index.</p> <p>b. The composition of the underlying index is subject to changes that may be affected periodically by the Index Service Provider.</p> <p>c. Performance of the underlying index will have a direct bearing on the performance of the scheme.</p> <p>d. The extent of the Tracking error may have an impact on the performance of the scheme.</p>

Index Methodology

Introduction

The Nifty200 Quality 30 index includes top 30 companies from its parent Nifty 200 index, selected based on their ‘quality’ scores. The quality score for each company is determined based on return on equity (ROE), financial leverage (Debt/Equity Ratio) and earning (EPS) growth variability analysed during the previous 5 years.

The weights of the stocks are derived from their Quality scores and square root of free float Mcap. The stock weight is capped at 5%.

Eligibility Criteria

- Stocks should form part of Nifty 200 index at the time of review
- In case of reconstitution of child indices, latest index composition including most recent changes in respective parent index whether announced or yet to be announced shall be considered. Child indices are defined as those indices where constituents are selected from a list of any other index. Nifty200 Quality 30 index would be considered as a child index as constituents of this index selected from a list of Nifty 200 index.
- Constituents should have a minimum listing history of 1 year
- At the time of index reconstitution, a company which has undergone a scheme of arrangement for corporate event such as demerger, capital restructuring etc. is considered eligible for inclusion in the index if company has completed twelve calendar months of trading as on the cut-off date after the stock has traded on ex. basis subject to fulfilment of all eligibility criteria for inclusion in the index.
- Stock should be available for trading in derivative segment (F&O).

- Stocks that moved out of the Nifty 200 at the time of review shall also move out of the index
- Top 10 ranked stocks on the basis of quality score are compulsorily included in the index, whereas existing stocks in the index whose rank goes beyond 50 are compulsorily excluded from the index
- Apart from the scheduled semi-annual review, additional ad-hoc reconstitution and rebalancing of the index shall be initiated in case any of the index constituents undergoes suspension or delisting or scheme of arrangement
- Further, on a quarterly basis, indices will be screened for compliance with the portfolio concentration norms for ETFs/ Index Funds announced by SEBI on January 10, 2019. In case of non-compliance of any of the stated norms, suitable corrective measures such as replacement of ineligible stock, re-alignment of constituent weights will be undertaken depending upon the nature of non-compliance to ensure the compliance of norms.

Tracking Error:
Performance difference between the scheme and the underlying index may arise as a result of several factors including:

- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sales proceeds and in receiving cash and stock dividends resulting in further delays in reinvesting them.
- Any costs associated with the establishment and running of the scheme including costs on transactions relating to investment, re-composition and other operating cost.
- Underlying index consider the prices of shares at close of business hours. However, the scheme may be able to buy or sell shares at different points of time during the trading session at the then prevailing prices, which may not correspond to the closing prices.
- Significant changes in the composition of the index, may involve inclusion of new securities in the indices in which event while the scheme will endeavor to balance its portfolio it may take some time to precisely mirror the indices.
- The holding of a cash position and accrued dividend prior to distribution and accrued expenses.
- Dis-investments to meet exits of investors, recurring expenses, etc. as elsewhere indicated in this Scheme Information Document.

We are complying with following norms for Portfolio Concentration for Index Fund as specified under the provision no. 3.4.1 & 3.4.2 of para 3.4 under Chapter 3 of SEBI Master Circular for Mutual Funds dated June 27, 2024:

- The Index shall have a minimum of 10 stocks as its constituents.
- For a sectoral /thematic index, no single stock shall have more than 35% weight in the index. For other than sectoral / thematic indices, no single stock shall have more than 25% weight in the index.
- The weightage of the top three constituents of the index, cumulative shall not be more than 65% of the index.

	iv. The individual constituents of the index shall have a trading frequency greater than or equal to 80% and an average impact cost of 1% or less over previous six months.
